

Requirements Engineering Trainings

ID	Description	Duration (hours)	Audience	Prerequisites	Bonus
RQMNT-I	Introduce the notion of requirements, methods to identify, define, approve and manage requirements	8	People interested in requirement management and traceability methodologies	None	2 hours of consulting offered
RQT-LEARN	Learn to setup a project, to run analysis on requirements traceability, and to correctly interpret the results	16	People starting with Reqtify	Basic knowledge in requirements management and traceability	4 hours of consulting offered
RQT-MNG	Learn to configure Reqtify: projects setup, export and reports generation	16	People in charge of the administration of Reqtify projects	Good knowledge of Reqtify. For beginners, "Learn Reqtify" course is recommended first	4 hours of consulting offered
RQT-SCRIPT	Maximize the Reqtify experience by exploring OTScript language capabilities	8	Anyone using Reqtify	Advanced knowledge of Reqtify. Programming skills recommended	2 hours of consulting offered
RQT-PCKG	Contents of RTQ-LEARN and RQT-MNG	32	People starting with Reqtify	Basic knowledge in requirements management and traceability	4 hours of consulting offered
RQT-SUTD	Discover the latest features of Reqtify, and the solutions on known and "unknown" issues	2	Anyone using Reqtify Web based Training	Knowledge of Reqtify is recommended	

Simulation and Modeling Trainings

ID	Description	Duration (hours)	Audience	Prerequisites	Bonus
COSIM-I	Learn how and when the co-simulation becomes a real benefit for complex systems simulation	16	Anyone involved in system/sub-system design and simulation	Knowledge of system design and simulation processes	Access to our InSystemLab co-simulation API
MAT-I	Discovery of the software suite: user environment, programming, graphics, data management	8	People starting with Matlab	Basic knowledge in mathematics and computer programming	2 hours of consulting offered
MAT-IPLUS	Learn more about scripting and programming features with Matlab	8	Anyone using Matlab	Basic knowledge of Matlab. "Matlab Introduction" course recommended	2 hours of consulting offered
MAT-ADV	Master Matlab and its programming to design complex algorithms	8	Anyone wishing to program with Matlab	Good knowledge of Matlab. "Matlab Introduction" and "Matlab Introduction Plus" courses recommended	2 hours of consulting offered
MAT-PCKG	Contents of MAT-I, MAT-IPLUS and MAT-ADV	24	People starting with Matlab	Basic knowledge in mathematics and computer programming	4 hours of consulting offered
SLK-I	Discovery of the graphical environment of Matlab: Simulink	8	People starting with Simulink	Basic knowledge of Matlab. "Matlab Introduction" course recommended	2 hours of consulting offered
MATSLK-API	Maximize the Matlab/Simulink experience by connecting with external programs	8	Anyone using Matlab/Simulink	Advanced knowledge of Matlab/Simulink. Programming skills required	2 hours of consulting offered

Tests Management Trainings

ID	Description	Duration (hours)	Audience	Prerequisites	Bonus
TSTLNK-I	Understand what is testing, why tests are important, and how to manage them. Work with TestLink, a testing software solution	8	Anyone starting with tests management.	None	2 hours of consulting offered
